

Features:

- Lightweight, easy to install
- Black color absorbs solar heat
- Snap-in lid
- No assembly required

Specifications:

- Dimensions: 39" H x 13" TD x 31" BD
- Volume: 40 gallons (151.4 litres)
- Weight: 10 lbs. (4.5 kgs.)
- Material: Recycled Polyethylene
- Colour: Black

Shipping and Ordering Notes:

- 25 per skid
- Skid weight: 250 lbs. (113.4 kgs.)

Enviro-Curb • Bardmatic Home Composting

The Enviro-Curb Home Composter has a reputation for very low maintenance making it an easy to use, unobtrusive composting container. It has been designed to break down food (including meat) and pet wastes.

Only a small amount of food waste remains at the bottom of the container since the majority of organic waste is approximately 80-95% water. The Enviro-Curb Home Composter produces a healthy compost full of nutrients and moisture. Yard waste in moderate portions including grass, weeds and leaves can be added in when mixed with kitchen scraps for an efficient break down.

With it's sturdy design it can last for years in all types of weather conditions. The Enviro-Curb Home Composter is easy to install, use and empty, and comes with a securable snap-lid to keep critters out.
